THE SENTENCE EVERY ENGINEER SAYS

It's a one-line change.

It never is.

pollinations.ai

ONE LINE CAN REACH

More than the file.

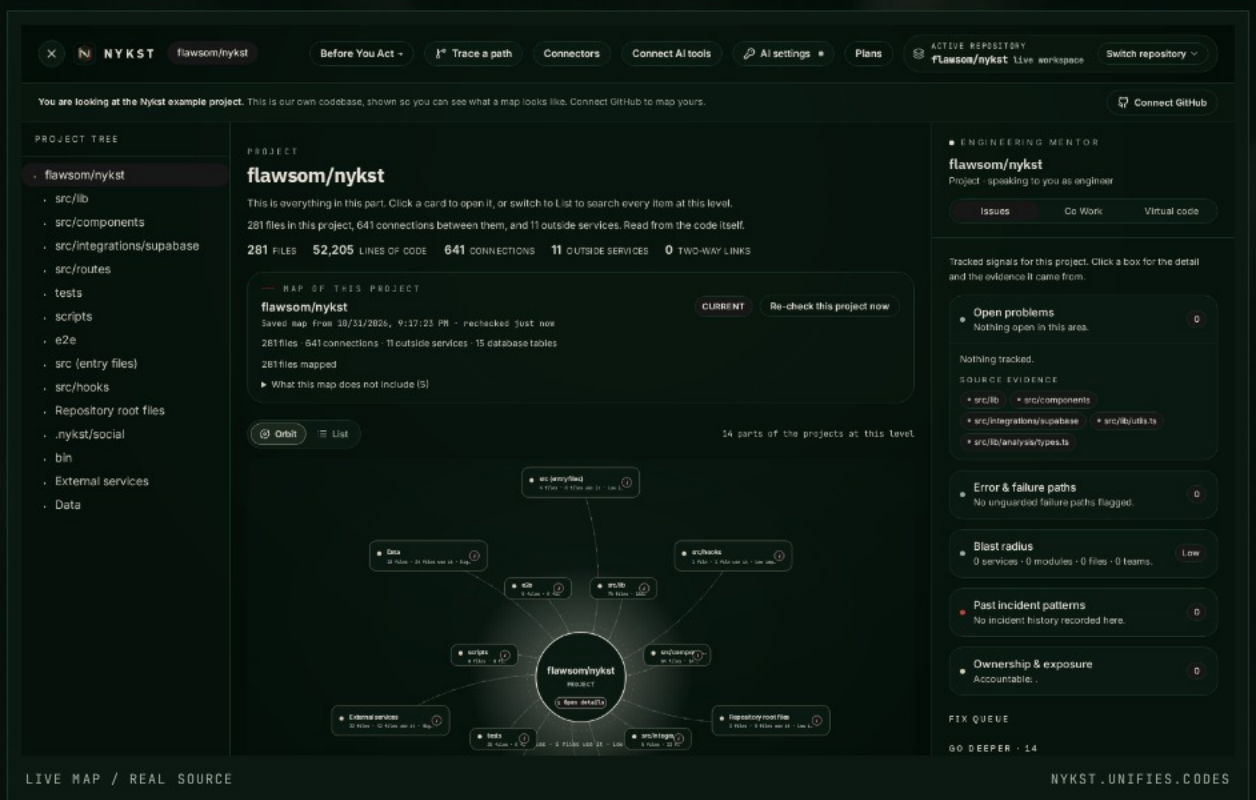

01	an import chain	EDGE
02	a rendered route	ENTRY
03	a database column	RESOURCE
04	a test you forgot	COVER

THE FILE IS THE SMALLEST PART OF THE CHANGE.

pollinations.ai

Most tools show you the code. Nykst shows you the consequence.

279	52,081	642	1.07s
FILES	LINES	CONNECTIONS	TO MAP

LIVE MAP / REAL SOURCE

NYKST.UNIFIES.CODES

EVERY NODE IS DERIVED FROM SOURCE. EVERY EDGE HAS A LINE.

NO CONFIDENT GUESSES

Every answer has an address.

src/routes/graph.tsx	L3
src/components/graph/GraphCanvas.tsx	L1
tests/graph-layout.test.ts	L7

File. Line. Chain.

No seeded graph. No guessed edges. No write access.

pollinations.ai

BEFORE YOU CHANGE THE LINE

Know before you edit.

Connect a GitHub repository. See the files, routes, tables and tests a change will reach, with a file and line behind every answer.
